The Vigor of **Swift & Company Continues** Only Because of Service

The only "control" over the packing industry is the "control" that gathers about the ability to do a necessary job in the best way.

Swift & Company has reached a leading place in the industry because the size and character of the job of providing a nation's meat require the wide and thorough organization, the experience and devotion to duty, found in an institution like Swift & Company.

The moment Swift & Company ceases to perform its functions of usefulness with the greatest efficiency and satisfaction to the people, its position in the industry will vanish.

Swift & Company service is performed at a profit of a fraction of a cent per pound.

Geological Survey Warning Against Shortage Of Coal

Buy your coal now, during the summer months, or you will have to pay higher prices this fall and winter and may be unable to get your orders filled promptly even at higher prices.

This warning has been issued by the United States geological survey. The survey declares there is a shortage of coal in sight for this winter and says there is grave danger of lack of this necessary fuel during the cold days to some.

The reasons for the shortage of coal are various, the survey says. It goes on to say: "The human mind is prone to forget the discomforts of the past in the comforts of the present. The coal troubles of 1917 are in the background, the summer is here, why worry about the future?"

It is poluted out that coal can not be stored in large quantities at the unines. It has to be moved when taken from the ground, and unless there are orders from the coal dealers will not give orders to the operators unless they corders to the operators unless they get them from the consumers, and hence the probable shortage unless the consumer starts the ball rolling in time to give the mines time to mine sufficient of the fuel to meet the fall and winter wasts of the nation.
